EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes were made in the claims:

In claim 5, line 4, "wherein the first rising" was changed to --a first falling edge control circuit, wherein the first falling--.

Authorization for this examiner's amendment was given in a telephone interview with Kenneth Oplinger on October 25, 2005.

STATEMENT OF REASONS FOR ALLOWANCE

The objections to the claims and the drawings have been overcome responsive to the amendments. Similarly, the non-enablement rejection has been overcome responsive to the amendment.

Claims 2-10 and 23-28 are deemed allowable because none of the cited prior art references disclose the specifically recited configuration further reciting an "inverter" and an "OR gate" or a "NOR gate" and the specific connections therefor.

Claims 11-22 are allowable because none of the cited references teach a circuit comprising four pairs of "edge control circuits" and two pairs of "edge output current regulation circuits" having the specifically recited connections and operation.
